

Intern at Infranode

Introduction - Are you ready to build a more sustainable future together with us, one investment at a time?

By joining Infranode you will be part of the investment team that is the first to invest long-term in infrastructure in the Nordics and build tomorrow's sustainable infrastructure sector in the region.

You will contribute to the identification and evaluation of sustainable investments within the infrastructure sector in the Nordics. In your work, you will get the opportunity to learn more about several subsectors within the energy, transportation, digital infrastructure and social infrastructure sectors. Typical tasks involve analysis, financial modelling, supporting our asset management team with an active ownership in our existing portfolio companies and creating presentation materials.

As Infranode is a fast growing company, we will encourage you to help us develop all parts of our business in a positive, proactive and open-minded spirit. We look forward to continuing to build on our inclusive, ambitious and fun culture. Join us in our journey to accelerate sustainable infrastructure investing in the Nordics and Europe!

Infranode as a company

We are a Swedish company that invests long-term in essential infrastructure primarily in the Nordic region within energy, transport, digital infrastructure and social infrastructure. We have EUR 1.5 billion ready to be invested from well-known pension funds and institutions such as Keva, LähiTapiola, KPA Pension, the Fourth Swedish National Pension Fund, Folksam, IMAS Foundation (IKEA) and the European Investment Bank. Infranode is a long-term owner and partner to both the private and the public sectors with an investment horizon of 25 years and a focus on stable, predictable returns. Due to the long-term character of the assets and projects invested in by Infranode, sustainability is central in every step of the investment process. Our sustainability philosophy is based on the conviction that there is no explicit conflict between doing sustainable and successful business.

By prioritizing sustainability, Infranode take responsibility for the entire lifecycle of infrastructure assets in order to create long-term value for society — from thorough analysis during the investment phase to active ownership during the asset management phase. All our investments need to support objectives of a sustainable future.

Our values and culture

As part of Infranode's team you will have the chance to work directly with the senior team in an entrepreneurial and fast-growing organization with an efficient decision-making process. Infranode will provide you with the opportunity for personal growth and an

exciting venture towards our vision of becoming a leading, long-term sustainable infrastructure fund manager in the Nordic Region.

The culture is characterized by a strive for excellence, an exceptional drive, a flat hierarchy and a relaxed work environment.
